

Executive Flight Services

specialist suppliers to the executive and VIP aviation market

Flight Crew Leasing Payroll Services HR Consultancy Training MRO

International Flight Crew Leasing

Resource Group includes the services of Contractair, one of the world's leading flight crew leasing companies, with over 300 flight deck personnel engaged on contracts worldwide at any given moment.

Resource Group is staffed by industry professionals with an understanding of not just the technical qualifications required of flight crew but also the additional skills required by flight crew in an executive or other VIP aviation environment.

Our experience has been gained in the provision of such crew for both long and short-term contracts in different types of working and cultural environments. All crews supplied are subject to vetting and reference checks.

International Payroll Services

Resource Group is able to offer a comprehensive payroll service managed from Switzerland, for the EU as well as offshore options.

Payroll solutions for flight crew, operations and MRO personnel can be provided. Our many years of experience of managing contracts means that we have specific knowledge of constructing employment relationships tailored towards the employment of such personnel. Our contracts reflect operating conditions and mean both customers and workers enjoy security and flexibility.

Our clients benefit from a range of deployment options for payroll solutions, from simple monthly or weekly payroll to more complex HR support delivered by experienced payroll and HR consultancy professionals.

HR Outsourcing

Resource Group's outsourced HR services are designed to allow customers to focus on their core business whilst outsourcing part or all HR services and related functions.

Backed by the Resource Group's experience of recruitment, payroll and training in aviation, all solutions are tailor-made according to individual customers and their unique operational environments.

Resource Group understands the challenges of the HR function in VIP and executive aviation and our experience allows our customers to attract, motivate and retain the right type of personnel. Completely unique and bespoke solutions are possible by integrating HR outsourcing with other related Resource Group services.

Resource's Executive Flight Services is a division of the Resource Group who's sole purpose is to support business aviation.

Principle activities include international personnel leasing (flight crew & MRO), payroll and related consultancy services for operators in the business aviation and VIP aircraft sectors.

The unique offering of our executive flight services division brings together the expertise of business within the Resource Group structure to offer bespoke solutions with strong emphasis on compliance, quality and customer satisfaction.

Maintenance, Repair and Overhaul Support (MRO)

The Resource Group Maintenance, Repair & Overhaul (MRO) team has the capability to introduce, at short notice, hand-picked individuals or teams of aircraft technicians across a range of disciplines to support your aviation requirements.

Specialist trained personnel include licensed engineers, avionics/electrical trades, mechanics, interiors and sheet metal workers. These personnel are available with experience on a variety of aircraft types.

Resource's executive flight services is supported by the Resource Group's highly regarded UK MRO business and where required its services can be combined with our training partner for truly bespoke solutions. As with all Resource Group business activities, strong emphasis is placed on compliance, quality and customer service.

EASA Part 147 Approved Maintenance Training

Our clients have access to the services of Lufthansa Resource Technical Training (LRTT), a joint venture partnership between Lufthansa Technical Training and the Resource Group.

LRTT offers Part 147 Approved integrated basic training solutions designed to match customer requirements using proven teaching methods and world class facilities for knowledge training, hand-skills training and practical training.

Currently the EASA Part 147 approval is for the delivery of Part 66 Category A1.1 Basic Training Courses, Part 66 Category B1.1 Basic Training Courses, Part 66 Category B2 Basic Training Courses and LWTR to Category B1 Conversion.

In addition to EASA approved courses LRTT also run a range of other fundamentals courses that offer additional skills training including aircraft structural hand skills, advanced composite repair skills and electrical hand skills.
