Maintenance Training

Manpower

We enable MROs, airlines and aircraft operators to achieve their business objectives by delivering cost-effective interim manpower and permanent recruitment services.

We believe in developing long-term, mutually beneficial business relationships with our clients and candidates.

Interim Manpower

Our MRO recruitment team is staffed by consultants from an aircraft maintenance background, meaning that we fully understand your requirements and are able to find you the right person to get the job done efficiently, safely and to the highest standard. Our team have the ability to hand pick an individual to fulfil a critical short term gap or source and manage teams for long term projects.

Our wide international experience means that we can seamlessly manage deployment logistics as well as ensure compliance with local legislation. This enables our staff to fully focus on the job in hand and means that you get the maximum output from day one.

Permanent Recruitment

Our extensive network of candidates and access to modern recruitment systems enable us to pinpoint the permanent staff essential for your continued growth. Our consultants are focused in the aviation industry so they are perfectly positioned to advise clients and candidates on current market conditions. We believe that matching skills is important, but that matching values is the key to successful permanent placements.

Recruit, Train & Deploy

Our recruit, train and deploy concept provides a risk inclusive approach to manpower delivery in this field. With this service Resource Group takes total ownership for:

- Skills assessment & gap analysis
- Interim manpower recruitment
- Bespoke training analysis & design
- Training delivery & assessment
- Manpower deployment & logistics

Fixed Price Work

Our in-house team of rotary maintenance experts have many years of experience in the delivery of fixed price maintenance and modification packages in the aviation industry. We are able to source the best team for the job, manage all the logistics and ensure your aircraft is operational again with minimum disruption to service.

Specialist recruiters of licensed and unlicensed engineers in Maintenance Repair & Overhaul for all aviation sectors.

Disciplines:

*Licensed engineers
Mechanics & fitters
Sheet metal workers
NDT technicians
Aircraft painters
Engine technicians
Technical services personnel
Planning personnel
Engineering management
Quality assurance staff
Airworthiness experts
Avionics / electrical technicians
Inspectors*

Interim Manpower

Permanent Recruitment

Maintenance Training

Technical Training

Resource Group was the first aerospace manpower supplier to recognise the synergies between recruitment and training leading to a joint venture with Lufthansa Technical Training in 2003, creating Lufthansa Resource Technical Training (LRTT).

LRTT is an EASA Part 147 Approved Basic Training Organisation based in the UK. In addition to providing EASA Part 66 Category A1, A3, B1.1, B1.3, & B2 courses, LRTT also provides skill enhancement training such as composite repair, electrical hand skills, structural repair and legislative updates such as human factors, aviation legislation and EWIS.

LRTT offers fully approved and modular fixed wing courses focused on the needs of the client and the individual. Courses can be studied individually or in multiples and in any sequence and all theory courses can be delivered at LRTT facilities or at your site should you wish. LRTT facilities include a purpose built training centre which houses a fully operational airliner for "on aircraft" practical training, a sheet metal shop, composite workshop and fully equipped classrooms.

EASA Part 66 Category A1 and B1.1 & B2 Licence Courses

LRTT offers fully approved basic courses for ab-initio students, modular courses for experienced engineers and a wide range of skills courses across a variety of subject matter areas.

The EASA Part-66 Category A licence provides certification for scheduled line maintenance and basic defect rectification tasks and can also be delivered as an apprenticeship. Training apprentices to Category A licence offers significant advantages in cost overheads and manpower flexibility.

LRTT provides training to EASA Part 66 Category B1.1 & B2 either as fully approved courses or as modular courses. This provides clients and individuals with a maximum level of flexibility when making this significant investment in training.

Those holding either a B1 or B2 licence can extend their licence to become dual licensed. This is an increasingly popular trend driven by the efficiencies that can be derived from employing multi-skilled staff and saving the cost of additional license holders.

LRTT provides packaged training solutions to remove restrictions on those that have restricted EASA Part 66 licenses. Sub modular options can also be offered where appropriate to lift limitations from restricted licences in certain European countries.

As an industry embedded training company, LRTT does not have a set academic year and utilises a flexible, cost-effective approach to deliver a bespoke training solution designed to fit with operational requirements of the client or individual.

More information about the services provided by LRTT can be found at: www.lrtt.co.uk

Interim Manpower Cover

Resource Group can provide interim manpower to cover operational requirements while training programmes are being fulfilled.

Services & Capabilities:

*Category A, B1 and B2 licences
B1 limitation removal courses
B2 limitation removal modules
B1-B2 licence extension course
B2-B1 licence extension course
CAT A modular courses
Fully approved CAT A course
CAT A advanced modern apprenticeship
CAT B1.1 modular course
Cat B1.1 fully approved course
Cat B2 modular course
CAT B2 fully approved course
Electrical hand skills
Composite training*
